

UNLOCKING THE POWER OF THREAT INTEL

As cyber threats become more sophisticated, organizations must not only stay ahead of attackers but also ensure compliance with evolving cybersecurity regulations. In this landscape, having access to real-time, actionable threat intelligence is crucial for safeguarding your business. Q-Feeds offers a comprehensive solution that empowers organizations to detect, mitigate, and respond to cyber threats before they can cause significant harm.

Powerful Threat Intel, Stronger Security

Q-Feeds provides you with actionable insights from 2,500+ sources—phishing, botnets, dark web—refined to boost your security.

Always Up-to-Date

Q-Feeds enables you to stay ahead as our threat data is updated every 20 minutes.

Easy Integration

Q-Feeds is active in 5 minutes with our pre-built setups for firewalls and SIEMs.

The growing regulatory landscape

The Cybersecurity regulations are tightening as governments and industries work to protect critical infrastructure and personal data. Compliance is now essential across industries, with severe penalties and reputational risks for non-compliance. Below are key regulations organizations face and how Q-Feeds supports compliance efforts:

NIS2 Directive (EU): Expands the scope of organizations required to maintain strict cybersecurity policies, focusing on incident detection, reporting, and risk management.

Q-Feeds provides real-time monitoring and intelligence to help organizations meet these demands.

ISO/IEC 27001: This international standard emphasizes continuous **monitoring** and **risk assessment**. **Q-Feeds** provides ongoing threat intelligence, strengthening the Information Security Management System (ISMS) to meet these standards.

GDPR (General Data Protection Regulation): Requires companies to protect personal data and report breaches within 72 hours. **Q-Feeds** helps detect potential breaches by identifying malicious activity, enabling faster response times.

PCI DSS (Payment Card Industry Data Security Standard): Focuses on securing payment card data. **Q-Feeds** enhances transaction monitoring and protects against fraud, helping companies comply with these strict security requirements.

DORA (Digital Operational Resilience Act): This EU regulation focuses on ensuring financial entities maintain operational resilience during cyberattacks, requiring continuous monitoring and fast recovery. **Q-Feeds** helps financial institutions detect and mitigate cyber risks to comply with DORA's strict operational resilience requirements.

Benefits of using Q-Feeds

The regulatory landscape will continue to evolve, and Q-Feeds is designed to help your organization stay compliant while strengthening your overall security posture.

Continuous updated threat intelligence	Seamless integration with existing security tools	Enhanced compliance capabilities
<p><i>Q-Feeds delivers threat intel, allowing you to take immediate action. This reduces the risk of data breaches, financial losses, and reputational damage. With updates every 20 minutes, Q-Feeds ensures that your systems equipped with the latest threat trends, allowing you to stay proactive instead of reactive.</i></p>	<p><i>Q-Feeds integrates with your firewalls and SIEMs without the need for overhauling your current infrastructure. This means faster deployment and quicker results—within minutes, your systems can be fortified with top-tier threat intelligence.</i></p>	<p><i>Q-Feeds simplifies compliance with regulations like NIS2, GDPR, and PCI DSS through actionable threat intelligence. Seamlessly integrating with firewalls and SIEMs, it rapidly strengthens your systems, ensuring security and compliance without infrastructure changes.</i></p>

Conclusion: Why Q-Feeds is your best cybersecurity investment

In a world where cyber threats are growing in sophistication and regulatory landscapes are becoming more demanding, working with Q-Feeds gives your organization a competitive advantage. Our **real-time threat intelligence**, **seamless integration**, and **regulatory compliance support** make us the go-to solution for organizations that prioritize security.
