Q-FEEDS

Threat Intelligence made easy and actionable

In today's digital landscape, where cyberattacks are increasingly sophisticated, businesses must stay ahead of threats. Q-Feeds is a Threat Intel platform designed to integrate seamlessly with your excisting infrastructure. We help to create a safer world by gathering data from over 2,500 trusted sources every 20 minutes to track and monitor global threats.

Q-Feeds solution

Powerful threat intel
Q-Feeds delivers actionable insights from 2,500+ sources.

Always up-to-date
Q-Feeds threat intel is updated every 20 minutes

Easy integration
Q-Feeds is active in 5 minutes with our pre-built setups

Q-Feeds helps customers to:

- **Detect up to 40% more malicious activities** on top of their current provider
- **Reduce response times:** Automated blocking and alerting at the firewall level.
- **Improve accuracy and efficiency:** Advanced filtering reduces false positives
- **Helps with regulatory compliance standards** like NIS2, GDPR, anzd ISO/IEC 27001.
